

RVP SERIES VACUUM PUMP

Elegance appearance and Strong power.

The RVP series vacuum pump introduces the UK's cutting-edge vacuum rotary vane technology, with the classic gas wave design and with the proven circulating oil lubrication system, RVP series vacuum pump perfect balances the strong pumping force, smooth operation and extremely low noise, which makes the RVP series vacuum pump became a new generation of classic production.

Since the RVP-series vacuum pumps entered Chinese market, we put all our efforts in development and research. Based on the actual domestic application scenarios, we have produced the extreme reliability and stability of the products, the RVP series vacuum pumps can be operated safely in extremely harsh environments. The simple installation and easy way maintenance methods allow you to choose and use with more confidence!

ABOUT REMARKBL

Remarkbl vacuum Technology Co., Ltd. is a high-tech enterprise which relies on advanced technology from the UK and consists of senior overseas returned engineers. It is mainly engaged in sales and maintenance of vacuum equipment and integrates scientific research and development, engineering projects and technical service. The company focuses on the production, sales and service of vacuum products, and provides professional vacuum solutions for various industries in China. The application of the products covers the industries including laboratories, analytical instruments, medical equipment, pharmaceutical chemicals, automatic handling, semiconductors, liquid crystal panels, new energy, lithium batteries and so on.

The company imported the latest vacuum pump technology from the United Kingdom, using imported processing equipment and testing equipment to manufacture high quality vacuum pumps. With a well-trained and experienced technical backbone team, we have been taking creating excellent quality and high reliability vacuum pump series products as our goal for many years and taking customers' demand as our base point of research and development.

Areas Of Application

Remarkbl vacuum provides highly reliable vacuum products and vacuum solutions for laboratories, analytical instruments, medical equipment, pharmaceutical chemicals, automatic handling, semiconductors, liquid crystal panels, new energy and lithium batteries.
